

# 7 Facts about the eScholar Team

In the last twenty years, the eScholar Team has grown from two people to a team of dozens of experienced leaders with expertise in education, data systems, project management, and more. Below are just a few of the highlights that describe our diverse and talented team.

## The average team member has 12+ years of experience in education and/or data science.

Our team members include educators, data scientists, software developers, QA specialists, project managers, and more.

## The average team member has been at eScholar for over 6 years.

We attract and retain a talented group that is committed to our mission and innovates every day.

## 46% of the eScholar team have earned advanced degrees.

This includes 18 Masters degrees and one Doctorate. There are also 17 specialized certifications among the team.

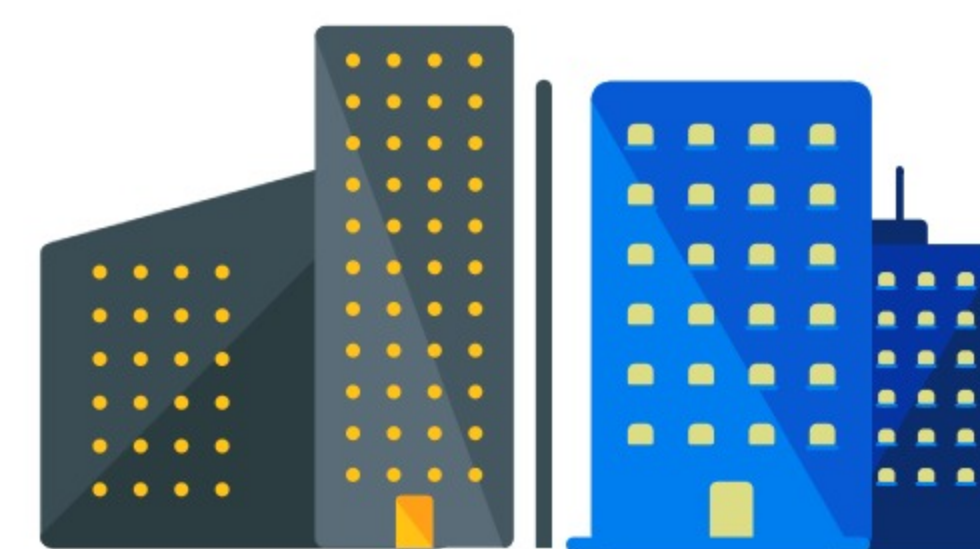

## Every project manager is PMP-certified by the Project Management Institute.

Ensuring that every project is on time and within scope and budget, every project is assigned a PMP-certified project manager.

## Our team members have worked for over three dozen educational organizations and Fortune 500 companies.

Prior to joining the team, our staff members have worked in local and state agencies, higher education institutes, and companies such as Deloitte, Questar, and P&G.

## We are committed to hiring the best staff, which means a diverse staff.

Diversity is an eScholar core value; 49% of our team are women and 51% of our team identify as racial/ethnic minorities.

## We are a team of leaders who aim to revolutionize education through data.

At eScholar, we believe that using education data can empower all stakeholders, including students, parents, and educators.
